Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

Ch. 2 – Introduction

You and your loved ones might be in serious danger of dying from a serious disease if you do not do something about it. This is a disease-filled world, and every day there are more and more new strains of diseases coming out. Every day in every country on this planet people are dying from such things as AIDS, cancer, Alzheimer's, diabetes and countless other diseases. Doctors and scientists work very hard to try and cure diseases, but they are merely treating symptoms and losing the battle. The diseases are winning.

Just imagine what it would be like if you never got sick again? What would it mean to you and every member of your family to live a happy and healthy life? No more doctor visits and no more long lines at the pharmacy for expensive prescriptions. What would it mean if even your pets could take something and remain healthy? Just imagine all the money that could be saved not only in doctor bills, but veterinarian bills too? Is such a remedy possible? Can there really be a remedy out there that can keep everyone in a single household healthy? Does it sound too good to be true? Do not despair, it is true. There is something that can be done to win the battle against sicknesses, diseases, and even migraine headaches! The name of this formidable new weapon is [Super Oxygen™](#) from Oxygen Products (Pty) Ltd., and it is something that should be in the medicine cabinet of every family on this planet.

What is Super Oxygen™? It is oxygen in a capsule. When taken with water, a chemical reaction takes place that releases oxygen into the system. Super Oxygen™ is one of the most powerful and versatile therapies known in alternative medicine, as it plays a vital role in maintaining good health.

What is the secret of Super Oxygen™? The name of the product says it all: Oxygen. An award winning doctor named Otto Warburg has proven that the root of all diseases is the body is having an insufficient amount of oxygen.

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

Oxygen is the most essential element human beings need to live, and a low amount of it in the body can cause serious damage. What happens when there is not enough oxygen in the body? A test conducted by Doctor Warburg on a cell proved that without proper oxygen levels, the cell turned cancerous after only being deprived of a proper level within forty-eight hours. This is what makes Super Oxygen™ Therapy so special. Each capsule is formulated with the following natural ingredients: Magnesium peroxide, Selenium, Vitamin C, Bioflavonoids, and also a few plants that are indigenous to South Africa such as the Sutherlandia plant and the Hypoxis plant. These two African plants have been used by African healers for centuries to cure various afflictions, and are known for their ability to strengthen the immune system and to also fight infections. Because all of these ingredients are natural, there is absolutely no risk, as long as these capsules are used in a proper manner.

How is Super Oxygen™ made? The wonders of technology are behind the creation of Super Oxygen. The essences from roots, plants, and minerals are combined to form the capsules. Super Oxygen™ is unlike any other herbal medicine before; a unique mixture of old remedies and old ways of using ingredients found in nature as a cure combined together with more modern medicinal practices. Why shouldn't medicine also benefit from the latest technology? In this day and age, one cannot turn on the television or pick up a newspaper or magazine without hearing or reading about some new wonder drug. Every time a commercial comes on the television for the latest cure, the side effects caused by the harsh ingredients and chemicals are almost as bad as or sometimes worse than the disease itself. It's expensive. It's dangerous. And most of the time it doesn't even work.

But the worst part of all these deaths and misery is that they are unnecessary. Because of these expensive and sometimes dangerous drugs on the market, people are seeking alternative treatments and alternative remedies rather than risk their health and life. No more, have families to watch with despair as their loved ones regress to a stage where they eventually die. The Super Oxygen treatment is gentle and subtle, yet profound, comprehensive and very effective. It's a form of medicine that could solve most of your health problems gently, inexpensively and quickly.

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

Ch. 3 - Can These Capsules Really Do All That?

Can Super Oxygen™ capsules really help cure diseases? Before that question is answered, the way the body needs oxygen and what oxygen does for the body needs to be explored. Oxygen is the building block of all life. So, what exactly does oxygen do? Every minute of every day, human beings breathe. With every intake of air, there is a certain percent of oxygen that is also taken in. There is a common misconception that when a person breathes they inhale one hundred percent oxygen; this is not true. When a person inhales, the percentage of the oxygen that is in the air is around twenty-one percent; the rest of the air is comprised of nitrogen. The air is breathed into the lungs, and it is here that an exchange takes place: carbon dioxide is traded for oxygen. The oxygen then leaves the lungs using the bloodstream, and it is from here that oxygen is transported through the body. This is why oxygen is so incredibly important. Without oxygen every cell in the body would not be able to change glucose into energy. Another bit of information about oxygen is that it changes the body's ph. to a more alkaline status, where illness cannot exist. This is why it is crucial that the body have the proper amount of oxygen in it; without oxygen there is no life.

Now, that it has been explained with regards the vital importance of oxygen, what do Super Oxygen™ capsules do to help fight disease? When a person is sick, whether it is the common cold or something a little more serious like the flu, the body is full of bacteria. The cells have been invaded by the flu-causing bacteria and there is a battle going on. The white cell count will go up to try and get rid of the flu. This is why a person gets a fever; the body is trying to defend itself against invaders. The capsules contain a formula of herbs and roots unique to South Africa. What these capsules do is super charge the body by infusing it with high levels of oxygen. It has been scientifically tested and proven that such things as bacteria, viruses, and toxins cannot survive in the human body when the oxygen content is above normal.

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

Super Oxygen™ can also help with such afflictions as [diabetes](#), poor blood circulation, gum disease, migraines, and it can even help with weight loss. What Super Oxygen™ does to help with all of these conditions, is that it not only floods the human body with vital oxygen it needs, but this high oxygen also helps cleanse cells and tissues. Just imagine what this means. Just imagine how a person is going to feel when they have irritable bowel syndrome or constipation. Super Oxygen™ would be the end of harsh laxatives that can upset the stomach and cause gas, cramps, and painful bloating. Why need laxatives when Super Oxygen™ will encourage the body to detoxify itself and cleanse the body in a natural way. Isn't taking those plants, herbs, and roots into your body the ideal way to stay healthy? Isn't the natural way the best way to take care of you and your loved ones?

How many Super Oxygen™ capsules need to be taken each day to take advantage of all of these amazing benefits? The answer to this question depends on what the problem is, but here are some examples of the amount of capsules that need to be taken on a daily basis.

It is [normally recommended to use](#) 1capsule 3x daily for maintaining good health. More chronic illnesses will require you to take 2 capsules 3x daily. Very severe conditions such as [Cancer](#) and [HIV/Aids](#) will require a person to use 3 capsules 3x daily. It is recommended to start on 1 capsule 3x daily and then to add another capsule every day e.g. Day 2 = 4 capsules, day 5 = 6 capsules, till you reach the required dosage. It is very important to use between 250ml – 500ml water every time you take the capsules. Flood the body with water to get rid of all those toxins!

Migraine Headaches: [Migraine headaches](#) occur when the blood vessels in the brain swell to the point where nerves are being subjected to pressure. This pressure in the head causes excruciating pain, and with it comes such things as sensitivity to light and sound, nausea, vomiting, and dizziness. For those individuals that are suffering from migraine headaches, it is recommended that five capsules be taken every day.

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

High/Low Blood Pressure and Poor Circulation: [Poor circulation](#) is a common condition that comes with age, and can cause weakness in the hands and feet. Poor circulation can also be caused by high or low blood pressure. If a person is suffering from poor circulation, high blood pressure, or low blood pressure, then the recommended number of capsules to be taken each day is six.

Detoxification/ Body Cleansing: For a person who is not suffering from any particular ailment but simply wants to rid their bodies of toxins, then six Super Oxygen capsules should be taken.

Weight Loss: Perhaps weight loss is a goal. Super Oxygen™ can help a person lose weight if nine capsules are taken each day. Watch the pounds and inches melt away as the body cleanses itself of unhealthy radicals. The numbers on the scale will start to come down in no time at all!

Chronic Fatigue/ Low Energy: A person who is constantly tired no matter how much sleep they get might be suffering from [chronic fatigue](#). Energy drinks or energy shots are loaded with chemicals that offer a rush of energy that quickly wears off and leaves a person feeling more tired than when they started. Energy supplements have been known to give people bad reactions such as rapid breathing and heart palpitations. When a boost of energy is needed, Super Oxygen™ is a great, natural way to re-energize with six capsules taken daily.

Asthma/Respiratory Difficulties: Having trouble breathing or catching your breath? Does the pollution outside make breathing difficult? Then Super Oxygen™ is the answer to take care of these breathing problems. By taking only five Super Oxygen™ capsules, the lungs will get the oxygen they need and breathing will be a whole lot easier. Say goodbye to expensive [emphysema](#) or [asthma](#) treatments!

Diabetes: [Diabetes](#) is a growing epidemic. Every day millions more in the United States and countries all over the world are reporting that more and more of their citizens are being diagnosed with this terrible condition. Diabetes is a condition when there is too much sugar in the bloodstream. If is it left untreated, diabetes can cause blindness, heart attack, stroke, kidney failure, and poor blood circulation that can lead to amputation. There

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

are a lot of drugs on the market for the treatment of diabetes, but many of them have caused serious harm or even death to those that have taken them. Every day it seems as though yet another diabetes drug has been shown to cause more harm than good. Why risk having a possibly fatal reaction to medicine that is supposed to help treat diabetes? There is a treatment for diabetes that does not involve dangerous pills that cost a fortune every month; the treatment is taking six Super Oxygen™ pills every day to help control blood sugar and make diabetes a thing of the past. One of the biggest open wounds in South Africa that could not heal in 16 years was treated with Super Oxygen™ and within one month a new skin like a baby's has covered that open area. No need for amputation. So, measure your blood sugar levels on a regular basis as you may not need to continue using any insulin at all! No more emotional ups and downs and the best blood circulation ever!

Fungal Infections: Have a fungal infection that turns your fingernails or toenails yellow and thick? Don't have a lot of time or money to go and see a doctor for this embarrassing condition? If the answer to this question is yes, then all you need to do is take eight capsules of Super Oxygen™ a day. Do not rely on prescription remedies with a lot of side effects. The great thing about Super Oxygen™ capsules is that the ingredients in them are one hundred percent natural with no harmful side effects.

Any serious condition/ailment: For those that did not see their condition listed here, there is no need to worry. Super Oxygen™ capsules can take care of any condition. To treat other ailments just take three Super Oxygen™ capsules three times a day to take care of whatever else might be causing less than perfect health. Remember, Super Oxygen™ is the only bottle of capsules you will ever need in your medicine cabinet.

Special Note: Please note that no matter what the condition is or how many Super Oxygen™ capsules are being taken daily, it is very important that those who take these capsules drink plenty of water with them. Water is essential for the [Super Oxygen™](#) capsules to do what they do best. What is happening inside of the body is a chemical reaction, which is the

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

capsules plus the water. The more water that you can drink with these capsules, the better off you will be! Think of it like this: every glass of water is taking you that much closer to ridding your body of disease-forming bacteria, viruses, or fungi. You will be drinking your way to good health and a brand new healthy way of living. So, let us all raise a glass of water and drink a toast to Super Oxygen™, the new wave of the future in the treatment of all sicknesses and diseases. To your health!

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

Ch. 4 - A New Treatment for HIV/AIDS?

In the 1980's, a deadly new disease started killing people. No one knew what it was, but the disease was spreading through every country in the world like a wildfire in a windstorm. The name of this terrible condition was called [HIV/AIDS](#). The word HIV stands for 'human immunodeficiency viruses, and the word AIDS stands for 'acquired immune deficiency syndrome'. What these two words meant was a death sentence. Scientists really do not have an exact answer as to where exactly HIV/AIDS came from. In 1999, a research group from the University of Alabama claimed to have some idea as to the origin of the HIV virus. After conducting research that spanned an entire decade, the group announced that the origin of HIV was very similar to a type of virus found to be carried in chimpanzees. Whether knowing the exact origin or not, the alarming fact was that this new disease was killing people. Something had to be done and done quickly to try and stop not only its spread, but the death toll from it that just kept rising.

What exactly is [HIV/AIDS](#)? Human Immunodeficiency virus is part of the retro virus family. What makes HIV different from any other virus, such as the flu, is its long period of incubation. Most people who are infected with HIV are unaware of its presence. There have been cases of HIV infection in some people that have been positive with it for years, but these people display no symptoms or any indications at all that they were infected. What is happening inside their body is the slow destruction of valuable T-cells in the bloodstream that help fight infection. By the time symptoms finally do appear, it is too late and by now the person has developed AIDS. AIDS is the last stage of the HIV infection. The letters stand for acquired immune deficiency syndrome. Contrary to popular belief and common misconceptions, AIDS itself is not what causes death. When a person gets AIDS death occurs from complications that happen because there is no longer a fully functional immune system. The HIV virus has not only destroyed the existing T-cells, but it has also prevented new ones from being generated. A person that has no immune system is extremely

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

vulnerable to any kind of illness. Imagine someone who is standing in the middle of a battlefield with no sword or armor to defend his or herself from attack. When a person with no immune system is exposed to something like a cold or flu they have no ability to fight off the infection. AIDS does not kill people, but the lack of an immune system is what ultimately takes the lives of those that are infected.

When [HIV/AIDS](#) first appeared in the United States, its first victims were homosexual men. This led many to believe that HIV/AIDS was a “gay” disease and that no one else was going to become infected. How wrong those doctors and scientists were. The facts are that HIV/AIDS is not just something that infects only gay men; it can hit anyone no matter how old they are or where they are from. No one has been spared from this deadly epidemic

Where is HIV/AIDS the biggest threat? Though HIV/AIDS is a worldwide epidemic, there is one country where HIV/AIDS is found in a high percentage of its population. The name of this country is South Africa and it has the highest amount of people living with this deadly disease in the world. As if that is not frightening enough, many of the infected are children.

What are some treatments being used in South Africa for HIV/AIDS? HIV/AIDS is a major epidemic in South Africa that has claimed the lives of millions of people and continues to do so every day. There is no known cure for this terrible disease. It is an unfortunate fact of life that even in the twenty-first century with all of the modern technology available people still dies from diseases. There is an old saying: desperate times call for desperate measures, and never have there been truer words spoken when it comes to the situation in South Africa

What does taking [Super Oxygen™](#) capsules do to the HIV/AIDS virus? With all the people that have taken the capsules thus far, we have seen a rapid response and no side effects. Everybody from various parts of the Country has come back with the same results within three months of using the capsules “the doctor says the virus is not detectable” Super Oxygen™ will improve the CD4 count and the viral load will be “not detectable”. What

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

are CD4 cells? Another name for CD4 cells is T-cells and these cells are located in the bloodstream. When a person has a cold it is the T-cells in the blood that help fight the infection and ultimately destroy it. [HIV/AIDS](#) destroys the CD4 or T-cells and thus leaves the body without an immune system. Another benefit of Super Oxygen™ for HIV/AIDS is that there are no harmful side effects. In fact, taking Super Oxygen™ for any condition poses no risk at all for the human body. Super Oxygen™ capsules will give the body a much needed boost of energy and help those, infected with HIV/AIDS, take their lives back.

Before treatment starts with Super Oxygen™, anyone who has HIV/AIDS, are challenged to have their CD4 numbers and their viral count measured by a doctor. After three months of taking Super Oxygen, or sooner, go back to the doctor, to have both the CD4 count and the viral load taken again. What will happen is that the CD4 count will get back to normal and the viral load will have dropped to a non-detectable status. Anyone who has HIV/AIDS must take Super Oxygen™ capsules if they want to improve their health and dramatically lower their viral load count. With no harmful side effects and a treatment that's affordable and all natural, there is nothing to lose and life to gain! When this product was taken in conjunction with ARV's it showed no side-effects that is normally experienced by patients that use ARV's and that gets so many patients hospitalized. Everybody, that has been using Super Oxygen for HIV/Aids has reported a boost in energy, right from the start, as well as feeling good on the program. Shouldn't healing be measured by the way we feel?

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

Ch. 5 – Conclusion

Super Oxygen™ is a one hundred percent all natural product that is designed to be a treatment for various serious conditions including asthma, diabetes, and high blood pressure.

Warning: The only people that should not take Super Oxygen™ are people that have had organ transplants. Super Oxygen™ will boost the body's immune system to the extent that the person will not know when the body may reject the organ that was transplanted. Super Oxygen™ is not a cure. What these capsules will do is help the body to heal itself. There are no harmful ingredients or dangerous chemicals that might cause bad reactions.

With expensive treatments on the market for anything from lung problems to fungal infections, Super Oxygen™ will cost just a fraction of what those expensive treatments will cost and there are no side effects. Super Oxygen™ truly is the only medicine a family will ever need in their medicine cabinet. Each capsule is made with herbs, roots and plants that are specially formulated to drink with water, and the combination will turn the human body into an environment with a high level of oxygen that kills bacteria and viruses. This product is so safe that even pets can use Super Oxygen™ capsules to stay happy and healthy. Say goodbye to frequent doctor visits! Say goodbye to costly veterinarian bills! Say hello to Super health! Super Oxygen™ is the right medicine, the right treatment, and the right way to take care of the entire family.

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

Ch. 6 – Testimonials

If reading all about the amazing Super Oxygen™ capsules is not convincing enough, here are a few stories from real life people that took Super Oxygen™ capsules, and it literally saved their lives. These are actual stories that had happened to people, and they were nice enough to want to share them here. The best way to get a message across is to share what Super Oxygen™ capsules has done for people.

Please note: To protect the identity of the people behind these incredible stories, their names have been changed.

Anita: Anita is a 55 year old woman that got chemotherapy and radiation for lung cancer. The radiation has burnt her skin to an almost black color. Within the first ten days of using Super Oxygen™, the skin started returning back to its original pink color.

Hilda: Hilda was diagnosed with cancer and started using Super oxygen capsules... after using just one bottle of Super Oxygen and a visit to her doctor, she reported – the tumor has become smaller and I feel great! The doctor is very happy with my progress...

Bill: Bill is a 64 year old diabetic, with high blood pressure. Because of his diabetes, he began having problems with his kidneys not flushing the toxins out of his system properly. Facing possible kidney failure, which meant dialysis for the rest of his life, Bill began taking Super Oxygen™ capsules three times a day. Within six weeks, his kidneys began working better and now he does not have to worry about dialysis anymore! Now, Bill has to see his doctor much less and does not have to take his high blood pressure medicine anymore. He says that it has been a long time since he felt so good and healthy. The Super Oxygen™ capsules that he continues to take even to this day are helping his blood sugar levels, and also helping his kidneys to do their job!

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

Ofelia: Ofelia is an 88 year old woman with chronic leg problems. Ofelia sometimes cannot walk because her legs get so weak. She has been in the hospital twice for blood clots in her legs, and one time she had an infection that nearly cost Ofelia her life. While in the hospital, Ofelia's best friend, Bertha, brought her a gift, a bottle of Super Oxygen™ capsules. Bertha told Ofelia what a blessing the Super Oxygen™ capsules were and wanted her to try them. Bertha wanted her friend to feel just as good as she had been feeling since she began taking the capsules. At first, Ofelia did not want to take them, but after hearing all the great things Super Oxygen™ capsules had done for Bertha, she began taking them every day! Ofelia was released from the hospital, and the doctors there ordered her a motorized wheelchair to help her get around her house better. A month after Ofelia started taking Super Oxygen™ capsules, her legs are so much stronger that she does not even use that motorized wheelchair and she donated it to a senior citizens' home. She has not had to go back to the hospital, and she has not had another blood clot since she started taking the capsules. Super Oxygen™ capsules keep Ofelia on her feet and now she has more energy!

Regina: Regina has a twelve year old Bison and poodle mix dog. The dog is named Lucky, and for the past couple of years she has been having a lot of issues with arthritis. Lucky's arthritis can be so bad sometimes that the poor little dog has a hard time getting out of her dog bed. The veterinarian had recommended to Regina that Lucky be put down. Regina was searching the Internet one night hoping to find a way to keep her best friend Lucky from having to be put down. She found the Super Oxygen™ website and ordered some capsules for Lucky. Lucky began taking Super Oxygen™ capsules once daily. It has been three weeks since Lucky began to take her capsules, and the results have been amazing! Lucky has been running around her yard, and can now jump up on her owner's bed. The veterinarian has been very impressed with how much better Lucky is and thinks that she will have many more years now ahead of her. Regina has a second Bison poodle dog and has been giving her the capsules as well to make sure that both of her best friends are happy and healthy. Just for interest sake – the capsules are opened and the powder put on the back of the tongue-and the animal then gets to drink water. It can also be mixed

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

with Marmite or Bovril that has a salty flavor, so the animal can crave water... Super Oxygen™ capsules really helped Lucky get her second chance at life!

Christine: Christine's full bred cat suffered with blood in the urine from time to time. Since she started the cat on Super Oxygen capsules the condition cleared up within 24 hours! In the past it took up to five days...

Thelma: Thelma is a 76 year old grandmother. Thelma has been having a lot of problems with her memory. Thelma sometimes forgets where she is or who she is with, and her son and daughter are scared that she may be developing Alzheimer's. Through a friend, whose mother was also showing signs of Alzheimer's, Thelma's daughter was given three bottles of Super Oxygen™ capsules and was told to give them to her mother three times a day. Thelma has been taking Super Oxygen™ capsules for a month now and the results have been incredible! Thelma remembers who she is with now and where she is, and she seems to have a sharper focus. The doctor that is caring for Thelma was also amazed in how much she has changed and wants her to keep taking her Super Oxygen™ capsules! Thelma also reported that the stuttering is gone! The whole family is now taking the capsules and all of them are reporting that they feel great and their health has improved dramatically!

This last story is very personal, but the author has given permission for it to be shared in this E-book. The names used are genuine in this story.

Albert: Albert is a 73 year old grandfather of a dozen grandchildren. He has been having health problems for most of his life. He has over two dozen bottles of pills in his medicine cabinet. Last month, Albert got taken to the emergency room and ended up having to be admitted with heart problems and possible kidney failure. The doctors gathered Albert's family and told them to prepare for the fact that Albert might only have a week left before he was going to die. The family was devastated to hear these words and started to pray for a miracle. The miracle came from an unlikely

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

source: one of the nurses that was caring for Albert. One night while the family was keeping vigil, she told them about her own personal experience using Super Oxygen™ capsules. The family asked if she had any available and she gave them a bottle she kept in the locker room where she kept her purse while she worked. The family began giving Albert the Super Oxygen™ capsules that very night. A week went by, and when Albert's condition became stable, the doctor recommended that he be discharged so he could be in a comfortable environment. The doctor still firmly believed that Albert was going to die, and told the family that they needed to start making arrangements with a funeral home. Albert went home, and by now the family had ordered bottles of Super Oxygen™ capsules and was giving them to him three times a day. Now it has been a month, and Albert is still very much alive! The Super Oxygen™ capsules have helped him regain his strength, and his heart problems where he would get short of breath and palpitations are gone and his kidneys are working just fine. The doctor that first told Albert's family that he was going to die is now completely shocked at how well Albert is doing. The doctor said the fact that Albert is still alive is nothing short of a miracle! Albert is no longer bedridden and is beginning to work in his garden again, something he had not been able to do because of his poor health. Next month, Albert and his wife are planning to take a trip to Kruger National Park to celebrate their fiftieth wedding anniversary, a milestone they thought they would never reach due to Albert's health issues. Albert has not stopped telling anyone and everyone he knows about the miracle of Super Oxygen™ capsules and has even given them to people who are suffering from the same kind of health problems he used to have. Albert wants everyone to know that Super Oxygen™ capsules saved his life!

Super Oxygen™ - The Only Bottle in Your Medicine Cabinet.

Thank you to all of our friends that gave a testimonial for this E-book. We appreciate all of your warm, kind, and inspiring words. For more information about various conditions and Super Oxygen™, please visit our website <http://OxygenTherapySA.com>

And with this E-book we want to extend a Welcome to You All - to come and share in the conversation with the Community we created on our [Facebook Fan page...](#)

There is Hope!
Do not give up...
